DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

A. U-shaped connectors:

Species 1, Figs. 1 and 2 representing U-shaped connectors having an upwardly angled base;

Species 2, Figs. 3 and 4 representing U-shaped connectors having a downwardly angled base;

B. Connector brackets:

Species 3, Figs. 5 and 6 representing outer corner connector brackets;

Species 4, Figs. 7 and 8 representing inner corner connector brackets.

2. The inventions are distinct because there is structural difference, separate utility for each of them and it is necessary to search for one of the inventions in a manner that is not likely to result in finding art pertinent to the other, resulting in the imposition of a substantial search burden on the examiner.

3. A telephone call was made to Daniel Cislo on 7/7/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

4. Applicant is required under 35 U.S.C. 121 to elect one single disclosed species (not one from each of the two groups) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.
MPEP § 809.02(a).
